WAVERTON
INVESTMENT FUNDS

Waverton European Capital Growth Fund a sub fund of Waverton Investment Funds plc

Class R GBP
ISIN: IE00BF5KTF74

Objectives and Investment Policy

Waverton Investment Management Limited manages the portfolio of this Fund.

We aim to provide you with an increase in your capital in the long term.

We invest in shares of large companies located mainly in the eurozone. We can also invest a small part of our portfolio in shares of smaller companies or in shares of companies from Emerging countries. Most investments we make are quoted on a stock exchange.

We take investment decisions on the basis of our analysis of the companies, which provides us with indications on the companies that are most likely to perform well in the long term.

This share class distributes an annual dividend to you.

You may sell your shares on any working day (generally, a day on which banks in Dublin and London are open).

The Fund declares dividends annually (generally, on 30 April each year). Unless you request cash payment, your dividends will be paid in the form of additional shares in the Fund.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For more information about the investment policy, see "Investment Objectives and Policies of the Funds" in the Fund's prospectus available at www.waverton.co.uk.

Risk and Reward Profile

The above indicator reflects the historical level of risk and reward of this share class over the last 5 years. As it is based on its historical behaviour, it does not necessarily reflect your future risk, nor reward.

This share class is classified as above, since it has experienced moderate movements in its price. This classification is solely valid as of the date of this document; it can change in the future.

If you invest in a fund in the category "1" above, you may sustain a loss. A fund in this category is not risk-free at all times.

This fund does not provide you with any guarantee on performance nor on the value of your investment in it. The latter may consequently go up, as well as down.

The indicator captures the impacts on the Fund of adverse movements in financial markets and currencies, under normal market conditions.

The following other risks can be significant to the Fund:

- The shares in which we invest can be easily sold in normal market conditions. Exceptional circumstances may lead to situations where those can only be sold at a loss for you;

- The shares in which we invest may be concentrated on a limited number of countries or economic sectors. We mitigate this risk by limiting the relative weight of the top investments in the portfolio;

- Investing in emerging economies can present risks inherent to political stability, economic conditions, and/or regulatory and fiscal environments that may adversely affect the price of the Fund.

More details on the risks you may face when investing in this Fund are described in the "Risk Factors" and "The Sub-Funds" sections of the Prospectus.
