Objectives and investment policy

Objective

The fund aims to provide long term capital growth.

Investment Policy

The fund invests in a diverse portfolio of assets, including collective investment schemes, company shares, structured products which themselves invest in derivatives (for both investment and/or to manage the risk profile of the fund), deposits, cash and/or near cash and investment trusts which may invest in shares and alternative asset classes such as hedge funds, structured products, infrastructure, property and private equity funds.

Essential features of the fund:

- The fund has the discretion to invest in the investments as described above with no need to adhere to a particular benchmark.
- You can buy and sell shares in the fund each business day.
- The fund aims to distribute available income every six months.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 3 because its volatility has been measured as medium to average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- Currency Risk: As the fund invests in overseas securities movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Liquidity Risk: The fund invests in traded life policies which may be difficult to sell. Their price may be subject to short term swings.
- Concentrated Fund: The fund intentionally holds a small number of investments including those that give an exposure to infrastructure projects and traded life policies. The fund may therefore be subject to larger than normal swings in its value.
- Non-UCITS Retail Scheme (NURS): The fund can be less diversified than UCITS schemes as it has higher investment limits for certain types of assets. It can also invest in assets which are not available to UCITS schemes. This can increase the potential rewards but can also increase risk.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.
